WORK EXPERIENCE

Data Science & Business Analytics Intern

2021 June- 2021 July

It is a 1 Month Long internship at The Sparks Foundation company. It is a virtual Internship in which I worked on 3 assigned tasks and learned more about data pre-processing, cleaning, visualization and how machine learning helps data to get useful insights out of it.
- Applications Used are: Spyder, Power BI.
- Technologies Used – Basic ML, Python Language and some Python Libraries like numpy, pandas, matplotlib, seaborn and Sklearn etc.

Smart Fertilizing Project

2021 March – 2021 June

It is an android mobile based application which consists of information about all types of fertilizers and crops being cultivated by the farmers in India. It suggests best fertilizers to the users based on information like crop name, type, soil type and diseases caused to it.
- Responsibility- Data gathering, database and query management.
- Team – Team consisted of 4 members worked on 10+ real life examples.

ACHIEVEMENTS
